EXPERIENCE

Everstar

New York, USA(Remote)

- **Software Engineer :- Supercharged end-to-end licensing process using Generative AI** *May 2024 - Present*
 - **Concept:** Utilized Generative AI to improve licensing experience for nuclear compliance, features include - semantic search experience, AI-generated draft submissions utilizing user's private assets and publicly available NRC files (over 2.9 Million documents).
 - **Frontend:** Used NextJS, TailwindCSS, RTK , RTKQuery, Logto
 - **Backend:** Used MongoDB, Prisma, Langchain, Langgraph, FastAPI

Ethica

San Francisco, USA(Remote)

- **Product Engineer :- Personalized House Search Optimization using Generative AI** *Feb 2024 - May 2024*
 - **Concept:** Utilized Generative AI to improve house search experience, capturing user lifestyle and preferences through audio inputs. Extracted key parameters to filter thousands of listings and deliver personalized recommendations.
 - **Frontend:** Used NextJS, TailwindCSS, Next-Auth, Framer Motion, and Jotai
 - **Backend:** Used Supabase, Prisma, OpenAI SDK, Anthropic SDK, Perplexity SDK, Mapbox SDK, and Assembly AI.
- **Product Engineer Intern :- Geo-Location Visualization for House Listings** *Sept 2023 - Jan 2024*
 - **Concept:** Developed a dynamic interface akin to Zillow, integrating geolocation visualization with detailed listing information. Implemented a map-based interface displaying real house listings with corresponding markers.
 - **Frontend:** Used NextJS and TailwindCSS to meticulously recreate the user-friendly interface reminiscent of Zillow's intuitive design, ensuring seamless navigation and information accessibility.
 - **Backend:** Used Google Maps API to integrate geolocation functionalities seamlessly into the platform, enabling users to visualize property locations effortlessly.

CracKube

Chennai, IN

- **Frontend Developer Intern :- Edutainment Platform** *July 2023 - Sept 2023*
 - **Concept:** Key contributor to an Edutainment Platform similar to Quora, fostering a dynamic environment where students ask questions. Vetted experts received compensation for their valuable responses, encouraging engagement and fostering a collaborative learning community.
 - **Frontend:** Used React.js, Node.js, TailwindCSS, Material UI, Redux, Firebase, React Auth Kit, Context API, and React-Router.

Freelance Work

Remote

- **Full Stack Web Developer** *May 2023 - July 2023*
 - **Concept:** Designed and developed a comprehensive website for the client's SaaS product, featuring a professional landing page, intuitive pricing page, and seamless integration with Stripe payment processing.
 - **Frontend:** Used NustJS, TailwindCSS, Stripe API.

PROJECTS

- **RAG Ollama (LangChain, LangGraph, LangSmith, Ollama, Lamma 3, Chroma DB, FastAPI, NextJS):**
 - Developed an Adaptive RAG Agent for document-based question answering tasks, utilizing PyPDF for PDF content extraction and OpenAI Tokenizer for vector embedding generation, stored efficiently in Chroma DB.
 - The agent routes questions to determine if answers reside within documents or internet-based sources. It evaluates document relevance and generates answers, rectifying potential hallucinations.
 - Answers undergo scrutiny for relevance. Enabled by LanChain's LangGraph framework, monitored via LangSmith, and served over FastAPI endpoints, with a Next.js web interface.
- **RudeGPT (NextJS, OpenAI SDK, AWS Amplify, AWS Cognito, AWS AppSync, AWS Dynamo DB):**
 - Developed a quirky and experimental iteration of OpenAI's ChatGPT, known as RudeGPT, through innovative prompt engineering techniques utilizing the OpenAI SDK, NextJS, and AWS Amplify.
 - Leveraged AWS services including Cognito for authentication, AppSync for real-time data synchronization, and DynamoDB for scalable data storage, ensuring robust functionality and performance.
- **Sentiment Analyzer (NextJS, Hugging Face SDK, ShadcnUI, TailwindCSS, Zustand):**
 - Created a sentiment analysis and review management tool using Hugging Face's Transformers library. This tool accurately analyzes sentiment in movie reviews, offering valuable insights for review management.
 - It provides comprehensive emotional tone insights, empowering users to enhance their review strategies.

SKILLS

• Languages:	Python, Javascript, Typescript
• Frameworks:	ReactJS, NextJS Langchain, Langgraph, Lamma Index, Express, Fast API
• Libraries:	Framer Motion, GSAP, TailwindCSS, Jotai, Prisma, RTK, RTK Query, Zustand, Zod
• Platforms:	Linux, Windows, MacOS, AWS, GCP
• Tools:	Git, GitHub, GitHub Actions, Kubernetes, Docker, Vercel
• DBMS:	PostgreSQL,Milvus,Pinecone,MySQL, SQLite, Firestore, Supabase , MongoDB
• Gen AI:	Semantic Search,RAG,AI Agents,Fine-Tuning
• Soft Skills:	Leadership, Project Management, Public Speaking, Writing, Time Management

EDUCATION

Vellore Institute of Technology Chennai	Tamil Nadu, India
• Bachelor of Technology - CSE; GPA: 7.75	Aug 2020 - Aug 2024
Courses: Operating Systems, Data Structures, Machine Learning, Reinforcement Learning, Networking, Databases
